Continuation of Substance of Interview including description of the general nature of what was discussed: Concern was expressed regarding the terms "process dependent sensor" and "process independent sensor" as claimed in independent claims. However the applicant's representative indicated that such terms are well known in the art and that the specification clearly defines the definitions of such terms. It was agreed that claim 16 should be cancelled since the language has been included in the newly amended limitations of claim 1. Claims 24-36 and 47-51 are directed to the non-elected claims and will also been cancelled To expedite prosecution an examiner's amendment will be used in order to issue a Notice of Allowance.
